SAHARA Universal Poverty Eradication

Dear the Civilize World

We are here now and every thing in such stats of poverty and very bad situations, do we need that? No we must work together helping our selves to eradicate and achieve the best to our motherland such as augment good food, forestry, clean water, hosing, and health car for every one and protect the environment

To sustain our survivor we must swagger and swear to help our brotherhood around the world plus turning the swamp land to be producing satisfactory food for every one a life that what I call survival in harmony and peace. To is proud of it.

We must ask our selves what we did today to Eradicate poverty that we are prouder and happy for it.

SAHARA HUMANITARIAN PROJECT

" NUM CHAI"

NUM CHAI (translates as KIND HEART)

Humanitarian project was established in Thailand to reach the less fortunate in its CHARITABLE AND PHILANTHROPIC EFFORTS.

The vast majority of the people are poor and impoverished and in desperate need of support systems in almost every one of the world.

The why we must copy the projects everywhere.

MAKE POVERTY HISTORY:-

That was the challenge to the British Prime Minister in 2005 and group eight (world leader) from The United Nations.

Is a unique alliance of charities, trade unions, campaigning groups, faith communities and high-profile individuals who are mobilizing in 2005 to drive forward the struggle against poverty?

This year, the UK is host to the annual G8 gathering of the world's most powerful political leaders and holds the presidency of the European Union.

We believe you all know that world poverty is sustained not by chance or nature, but by human decision. Decisions made by leaders like all of you.

In this time, and in this generation, we must put an end to poverty forever. We will play our part and you must play our part as well as the group eight (G8) and the European Union Council of Ministers.

The stakes couldn't be higher. As all know, more than a billion people, one in five off the world's population, live on less than 65p a day. A child dies every three seconds from hunger and preventable disease. AIDS claims six lives a minute.

We must persuade and other G8 as well as European leaders that:

* It's time for trade justice: The European Union must fight to ensure that governments, particularly in poor countries, can choose the best solutions to end poverty and protect the environment; and export dumping that damages the livelihoods of poor communities around the world; and makes laws that stop big business profiting at the expense of people and planet,

* It's time to drop the debt: The unpayable debts of the world's poorest countries should be cancelled in full, by fair and transparent means.

* It's time for more and better aid.

Donors must now deliver at least \$50 billion more in aid per year and set a binding timetable for spending 0.7% of national income on Aid must also be made to work more effectively for poor people.

We see trade, debt and aid as inseparable parts of the whole.

A BREAKTHROUGH ON ONE OR EVEN TWO OF THE AREAS WILL NOT BE ENOUGH TO CONSIGN POVERTY TO THE HISTORY TO THE HISTORY BOOKS. SO WE WON'T ISSUES TO BE PICKED OFF.

Only progress on all three will deliver for the world's poorest people,

Changing the minds of some other leaders will not be easy to face millions of better. We are hereto making sure you live up to it.

Throughout 2005, we will be keeping up the pressure on you to take advantage of every single opportunity. As you head to Gleneagles, we will be watching to see that you don't falter. When you take over the presidency of the European Union, we will be there to hold you to account for Europe's role.

Over the following pages we will set out the areas where we demand change. We will show you, with examples and case studies, the ways in which the Governments are implicated in global poverty. We will show you what has happened on you watch, as well as pointing to issues where the Government deserves credit. We will also remind you of the many areas where the UK Government could use its influence to persuade others to deliver for the world's poorest people.

"Num Chai's Projects"

Our aim is to build a community complex around "Education" i.e. schools for children, adult education and learning-skills centers for sewing, painting, arts and crafts etc.,

1. Educational Programmers

Educational is the key to the long-term success of development projects as it promotes self- sufficiency. We will sponsor children's education from elementary level through to vocational training and university studies.

2. Child Development Centers

These Centers are to be located in remote areas all around the country, and they work to assist children from disadvantaged families, providing general welfare and developmental services. One of our main programmers is the daily lunch programmer, aimed at eliminating malnutrition amongst children. The programmer provides food with the most nutritional value such as milk, fruit and Soya beans.

3. Development for village families

The cycle of poverty can be ended with assistance, which will promote self-reliance. We aim to assist families to develop many types of productive business ventures such as fertilizers, animal feed, livestock, and agriculture.

4. Health, Hygiene and Community Programmers

At the field level, we will assist villagers by constructing toilets and water jars, providing vaccination against disease and training people in nutrition and hygiene. Community programmers include housing projects and the construction of public amenities such as electricity generating facilities, water supply facilities, health clinics and multi- purpose community buildings such as libraries, playground and community centers.

The long-rang goal of the Thai "Nam Chai" Humanitarian Project is to build a complete complex (as described above) in each of the 76 provinces of Thailand. Each of these complexes, is estimated to cost around 85,000,000 Baht (Eighty five Million Baht) to complete, and will provide employment to the future residents during the construction and development stages.

Our initial aim is to construct and operate complexes in the ten most impoverished provinces. As soon as it is financially viable, we will continue to build the next batch of complexes till we complete every one of the 76 provinces. The total project costs required will be around:

$85,000,000 \times 76 = 6,460,000$ Baht

The U.S Dollar equivalent is US\$ 153,809,523

The total amount required for the humanitarian project is estimated to be about US\$154,000,000.00 (United States Dollars One Hundred and Fifty Four Million)

Madame Olivia Y.M Liu and/or her designated assignees will complete this project.

The following are some projects which we contributed from our family private funds over the past 36 months:

* HRH The Late Princess Mother's Personal Projects in Lampang, Mae Hong Son, and Chiang Mai provinces;

- * Human Development Centre in Klong Toey- SKIP Schools, AIDS Hospice and Street Kids Programmer;
- * Cheshire Homes in Roi ET and Chiang Mai;
- * Rural Ear, Nose and Throat Mobile Clinic in the North of Thailand;
- * Sataban Saeng Sawan Home For the severely mentally retarded children;
- * Light of Heaven Orphanage in Nakorn Sawan;
- * Mckean's Rehabilitation Centre in Chiang Mai for the disabled and former leprosy patients; St. Joseph's Home for the A ged in Betong;
- * Welcome House Aids Response Program in Bangkok;
- * Sisters of Good Shepherd day care centre in Nong Khai for young girls from poor families;
- * Baan Khun Wong Primary school in Mae Hong Son;
- * Caulfield Foundation for the blind;
- * Siam Care Home Base in Bangkok for HIV – infected mothers and babies;
- * Rural Area Medical Aid Foundation, which provides doctors, dentists, pharmacists and nurses in remote areas;
- * St. Vincent de Paul projects for a small water reservoir in Ranong province and a water – storage system in Chiang Rail and
- * Medical School Scholarships.
